About Me

I'm a researcher in the Systems and Networking research group at Microsoft Research Asia (MSRA). Before joining MSRA, I obtained Ph.D. and B.S. in Computer Science from Peking University in 2019 and 2014 under the supervision of Yao Guo, Xiangqun Chen and Gang Huang. I was also advised by Jason Hong and Yuvraj Agarwal when I was a visiting student in the Human-Computer Interaction Institute at Carnegie Mellon University.

Research Interests

My research interests lie in the intersection of ubiquitous computing (UbiComp), software engineering (SE), and artificial intelligence (AI), where I've published more than 15 research papers in premier venues such as UbiComp, FSE, and ICSE, including a best paper nomination in UbiComp '2016 and a best paper in IS-EUD '2017. My recent work focuses on the reliablility and privacy issues of AI and AIoT. I enjoy building systems and tools to foster the development of ubiquitously connected world.
